

illuminet

Exklusives Lichtdesign.

Sense & sensuality.

The individual interaction of functionality and aesthetics is the essential element of modern bathroom architecture. Because no other living space is as intimate as the bathroom.

Whether at home, in an hotel, in a spa or in a fitness studio – it is a very special wellness area in which to let one's spirits soar or enjoy the pure functionality of the bathroom in a pleasant atmosphere.

In this environment, the light is the main actor of an atmospheric setting - both as room lighting and a bathroom architecture design element, and also because it exerts a positive influence on the human biorhythm: blue light activates, light with a high red content leads to a pleasant relaxation and wellness phase.

The wall niche **illuminet**, the entire surface of which is illuminated, is used as part of the atmospheric setting within the oasis of wellness that is the bathroom. It conjures up a touch of elegance and luxury in this very personal living space.

The wall niche is manufactured from high-quality mineral material. The entire rear wall is illuminated homogeneously, lending its reflective sides a soft glimmer of light.

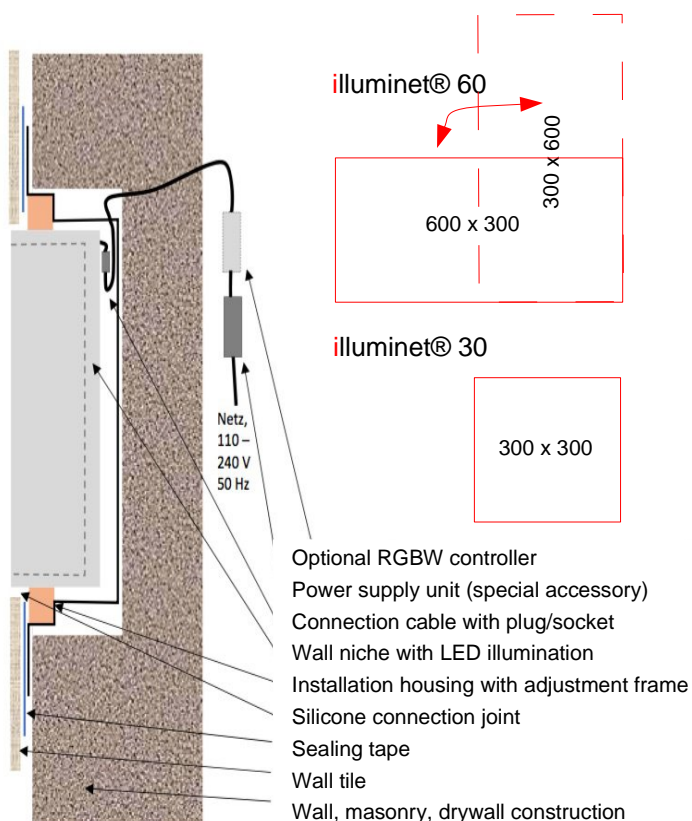

Designed in various shades of colour and white for puristic bathroom design or with individually adjustable colour changes for a sensuous lifestyle, **illuminet** is part of the functional, atmospheric light concept.

And by no means least: **illuminet** provides space for high-quality bathroom accessories or exclusive decoration objects.

Functionality & aesthetics.

illuminet is suitable for use in the wet and dry areas of solid masonry or in drywall construction. It can be installed flush as well as protruding. The high-quality wall niche is available in two sizes: illuminet 30 measures 300 x 300 millimetres, while illuminet 60 forms a rectangle with dimensions of 600 x 300 millimetres. illuminet 60 can be installed both horizontally and vertically – one version, two installation options.

The wall niches are equipped with highly efficient low-voltage LED technology, and guarantee the required electrical safety in the bathroom. In the RGB plus white version, the colours and settings can be actuated either by remote control or with a touch panel for installation in the flush mounted box.

Technical data	illuminet 30	illuminet 60
Exterior dims. (mm)	300x300x110	600x300x110
Interior dims. (mm)	275x275x93	575x275x93
Installed dims. (mm)	370x370x120	670x370x120
Power output, RGBW	10W	17W
Power output, white	5,8W	11,5W
Illumination	RGBW 4,000K / White 2,700K	
Voltage	24V DC	
Material	White mineral material, translucent at the rear, installation housing polystyrene
