Precise Dimming, Perfectly Integrated: KNX-DALI Gateway

With DALI now a standard in lighting systems, the built-in KNX-DALI gateway in the Atios KNX Bridge reduces hardware costs and saves cabinet space. Simplify your installation and let your clients enjoy modern lighting control.

Connect using the Embedded KNX-IP Interface

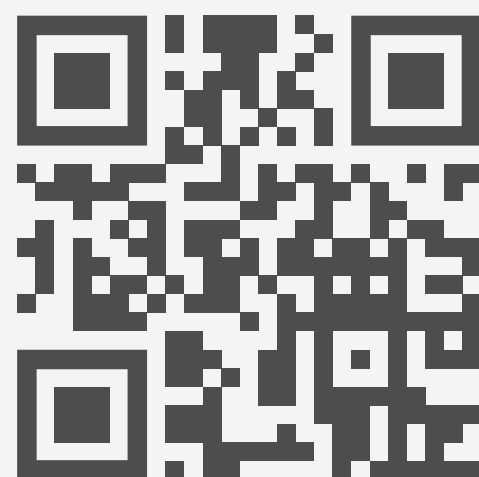

Remove unnecessary devices and use the integrated KNX-IP Interface for seamless programming and monitoring of your KNX system with tools like ETS (Engineering Tool Software).

What's next?

Our upcoming remote access feature enables remote KNX programming via ETS.
