F22 Bail-latch Connector IP68

F22B F22D/S

Water-related environments.
Underwater environments.
Uncertain breakdown lengths or on-site length adjustment.

Feature

It is a submersible field-assembly connector developed for underwater use up to 5m depth, employing the classic ClearTech Insulfit[™] to seal the light end with an enhanced protection level. Consists of 3 types of structural design to enable sufficiently watertight. And the noticeable one is the idiot-proof integrated injection-molding waterproof treatment, which helps simplify the installation process and ease the operation error on the site. Secured by the picked sealing materials, the reliability remains the same in the long run, as the internal silicone performs well in the weather resistance, and the external stainless steel makes it rust-resistant. The whole assembling process is quick and convenient.

In-house Test

Test Object	No.	Experiment Item	Standard
Metal Parts	1	Weather Resistance-Salt Spray	IEC 68-2-11
Waterproof Connector	1	Waterproof-IPX5 / IPX7 / IPX8	CLEAR-defined®
	2	Swing-extreme	CLEAR-defined®

[®]Before waterproof test, high-low temperature cycling shock test has been implemented to simulate the outdoor harsh weather, and it's a more stringent standard we're compliant with than third party's.

Dimension: mm

Bail-latch Front Connector

F22B-VB/HB-BL/FC-01/02-E F22D-HB-BL/FC-01/02-E F22S-HB-BL/FC-01/02-E

Bail-latch End Cap

F22-BL/EC

Note:

1.Unless otherwise stated, the tolerance of the connector is ± 0.5 mm,

Note:

1.Please ensure the cable length is not more than the "Max. Cable Length" in the page mentioned above according to light length and its wire gauge to minimize voltage drop. 2.All the nominal cable lengths are measured before processing, so the delivered (visible) ones would be a little shorter. Please contact us before ordering if any strict requirement on them. 3.The tolerance range of cable length enlarges as the cable becomes longer, maximum up to ±50mm.

Male & Female Connector

For plug and play cable junction, IP67

2. To avoid damage from the excessive force on cable joint, please keep at least 60mm of cable ahead in the natural state.
